AG Komplexe Analysis

laden wir zu folgendem Vortrag ein:

A new notion of tameness

(Riccardo Ugolini, University of Ljubljana, Slovenia)

am **Donnerstag, den 02.11.2017, um 12 Uhr s.t. in Raum G.15.25**.

Abstract: In 1988 Rosay and Rudin described many properties of the group of holomorphic automorphisms of $\mathbb{C}^n$, $n > 1$. Later on, their ideas were applied to more general complex manifolds. Starting from their work, we will explore an equivalent definition of tameness developed in the last year in collaboration with R. Andrist.

Alle Interessenten sind herzlich eingeladen!
