Telefon: (0202) 439-3041
Raum: G.15.19

Im Rahmen der

AG Komplexe Analysis

laden wir zu folgendem Vortrag ein:

On the semicontinuity theorems of automorphism groups
(Prof. Kang-Tae Kim, POSTECH, Pohang, Korea)

am **Montag, den 10.02.2014, um 16 Uhr c.t. in Raum D.13.15**.

Abstract: Symmetry is easy to destroy, but restoring it requires a definite effort. Such principle, as natural as a law of the nature (Taoist?), has a mathematical contents and surprisingly a deep tradition in research. In this talk, I shall present this long line of research from M.H.A. Newman of 1930s, Montgomery-Zippin (1940s), Ebin (1968), Greene-Krantz (1982, 85), and the recent work of Greene-Kim (2014).

Alle Interessenten sind herzlich eingeladen!

gez. Prof. N. Shcherbina
